

- **What is the SRS Application?**

- SRS is a multifunctional tool aimed at providing a predictive risk likelihood calculation based of DCMA surveillance data, Service linked databases, and contract information to be used in planning and adjusting surveillance within DCMA.
- Accessed Throughout the Acquisition Cycle:
 - Primarily Post Milestone C
 - Earlier data collection provides Agency benefits well before Milestone C
- SRS is not for procurement decisions

- **Integrated, Enterprise SRS yields:**

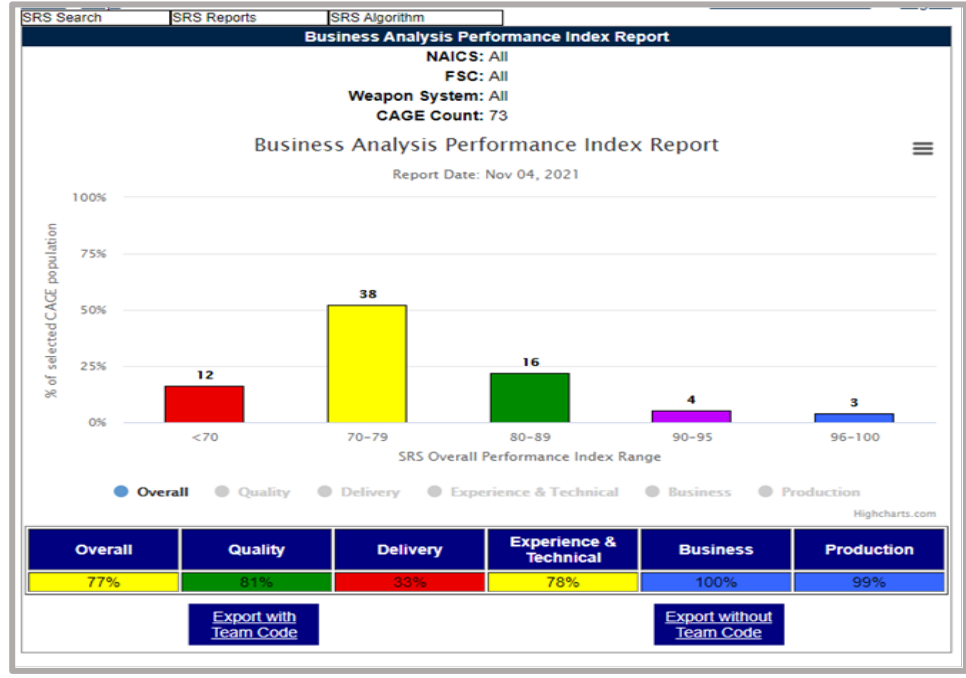

- A Risk-based view into programs, industrial sectors
- Improved Strategic, Operational, and Tactical DCMA and Customer Program Engagement

- **List of SRS reports available:**

- Business Analysis Performance Index Report
- Weapon System Performance Index Report
- FSC Performance Index report
- NAICS Performance Index Report
- Parent/Child CAGE Report
- Trend Analysis Report
- Surveillance Plan CAGE Report
- LOD/QALI CAGE Report

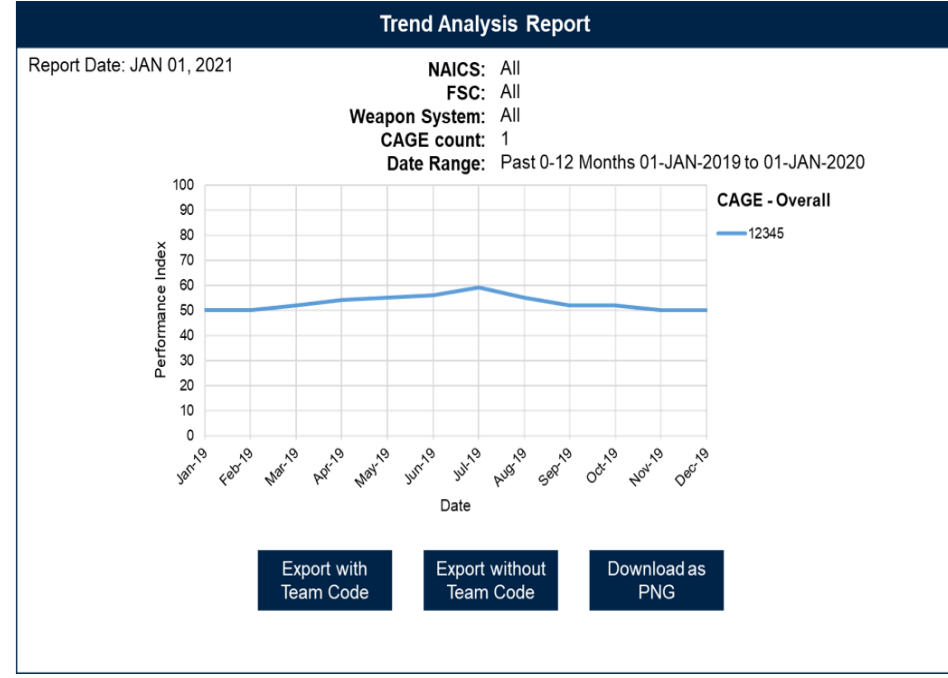

- FSC - Federal Supply Class
- NAICS - North American Industry Classification System
- CAGE - Commercial and Government Entity (CAGE)
- LOD – Letter of Delegation
- QALI – Quality Letter of Instruction

Business Analysis Report

- This example illustrates that 50 CAGES are performing in higher risk categories (Red/Yellow).
- CMO leadership could focus limited resources on those suppliers performing at 79% or lower.

Trend Analysis Report

- The Trend Analysis Report compares the overall performance of the user selected CAGES in chart format and with user selected timeline.
- This report also has the capability to drill down into the other performance indices.
