DMSMS Policy & Training

AFMCI20-105

- **SASPO serves as the command DMSMS program office and provides AF programs access to:**
 - **Training and resources for effective management of DMSMS**
 - **Assistance with development of a DMSMS Management Plan**
 - **Assistance with identifying necessary technical data**
 - **Identifying opportunities across platforms to share resources and minimize the duplication of effort**
 - **Analysis and resolution capabilities including a DMSMS case resolution archive**
 - **Provides guidance for DoDI/DoDM 4245.15 metrics, as well as guidance on the MICT checklist**
- **SASPO programs are centrally funded, no cost to Air Force/Space Force programs**

Collaboration SharePoint Site

- **AFMCI20-105 mandates SASPO to maintain a collaboration SharePoint to provide programs with up-to-date DMSMS information**
 - **The collaboration SharePoint contains:**
 - **SASPO DMSMS training slides and templates**
 - **DMSMS SME list of all current programs identified**
 - **Examples of Charters, DMSMS Management Plans (DMP) and Contract language**
 - **Predictive tool DD2875's, Government and contractor NDA's, and instructions**
 - **Organizational charts and links to policy & guidebooks**

Collaboration SharePoint site web address:

https://usaf.dps.mil/sites/TMC719229/GUMD/DMSMS_Collaboration/SitePages/Home.aspx

DMSMS Policy & Training Support Team

- **Bowhead Mission Solutions LLC**
 - **DMSMS policy & training team provides:**
 - **DMSMS briefings and training assistance for all Air Force Programs**
 - **Limited FMS Support**
 - **DMSMS Management Team (DMT) member for all program offices**
 - **Review Charters, DMSMS Management Plans (DMP's), Statement of Works (SOW's), Contract language, etc.**
 - **Manages the AF DMSMS Subject Matter Expert (SME) list, which is consolidated on the SharePoint**

Tool Program Capabilities

- **BAE Systems' Predictive Tool (AVCOM) allows users to:**
 - **Pinpoint and predict obsolescence**
 - **Assess the impact of obsolescence across all platforms**
 - **Determine “obsolescence density” within the SRU, LRU, and complete system**
 - **View DLA part inventory and usage rates**
 - **Perform global part number search**
 - **Perform entire system studies**
 - **Submit and track problem parts reports**
 - **Request SASPO Analysis & Resolution (A&R) services via the STAR module**
- **Training and onsite/virtual support available**
 - **Training opportunities sent out monthly**
 - **Courses range from beginner to advanced, or one-on-one training as requested**

Analysis and Resolution (A&R) Program

- **Bowhead Mission Solutions LLC provides in-depth Analysis and Resolution (A&R) to mitigate both present and future obsolescence issues**
- **A&R provides support for government IPTs:**
 - **Professional engineers validate all engineering resolutions**
 - **Programs will need to validate any proposed resolutions due to OSS&E requirements**
 - **Accesses commercial and government databases (i.e.; Haystack, WebFLIS, etc.)**
 - **Recommends most cost-effective solutions**
 - **Provides Equipment Specialist (ES) AFTO 22s to change source data**
 - **Provides cataloging data as necessary**
- **A&R services are requested using the AVCOM STAR Module to receive, send, and store analysis documentation**

A&R Capabilities

- **AVCOM STAR module has 3 types of classification:**
 - **Proactive: Identify and prioritize Line Replaceable Units (LRUs)**
 - **Prioritized list is coordinated through DMSMS team**
 - **Analyzes all applicable DMSMS issues within each LRU**
 - **Reactive: Urgent or Routine**
 - **Urgent requests are resolved within 10 working days**
 - **Routine requests are resolved within 20 working days (Includes DLA 339)**
 - **System study**
 - **Provides in-depth analysis within 30 working days (typically at LRU or SRU level)**
