

## BIOGRAPHY

### **Chris Garrett, Technical Advisor for Architectures, AFLCMC/EN-EZ**

Chris spent over 27 years active duty in the Air Force working in the areas of electronic warfare, test, space, and aircraft sustainment where he spent over two years at Robins AFB leading the C-17 group. He finished his career as the Deputy Director for Engineering and Technical Management at Air Force Materiel Command. As Deputy Director, Chris focused on three areas – System of Systems Analysis, Open Systems Architecture, and Strategic Planning. From September 2015 to February 2020, Chris worked in the engineering home office at the Life Cycle Management Center where he focused on infusing open standards and architectures across Air Force weapon systems. Also, he led an effort to build an Air Force ecosystem where open standards, agile processes and digital engineering could be combined to delivery capability expeditiously to the

field. In February 2020, Chris was appointed to be the Senior Leader for Systems Engineering in the Air Force. In this job, his current focus is being the technical lead for the AF Digital Campaign.
