

Value Engineering

Increasing value by lowering cost while maintaining function

What: Value Engineering Workshop--Implementation strategy for updated DoDI 4245.14 and SD-24 rollout

When: August 19–23, 2024

Where: Army of Corps of Engineers (USACE) facility, Louisville, KY

POC: Toni Hamilton, toni.m.hamilton-datcher.civ@army.mil

Who: DoD Component Participants

***Value Engineering Workshop:
Seeking DoD Component
participants to provide
implementation considerations
and develop a comprehensive
strategy for updated DoDI and
SD-24 rollout.***

Background:

As part of rolling out the updated DoD Instruction 4245.14: DoD Value Engineering (VE) Program, R&E is sponsoring a workshop to help OSD and Components develop their VE implementation strategy to incorporate the requirements of the refreshed DoDI 4245.14 and subsequent updated guidance in SD-24 VE: A Guidebook of Best Practices and Tools. The workshop will be hosted by USACE the week of August 19, 2024, 4803 Olympia Park Plaza, Suite 1000, Louisville, KY 40241-3068.

Components are encouraged to participate for the full duration of the workshop, which will also have a virtual participation option.* The workshop will run from 0900 to 1600 Eastern with a one-hour lunch break. The virtual platform will be provided by workshop facilitator.

*Please note that in-person attendance is recommended to fully benefit from the interactive workshop environment.
